SUMMARY

Enthusiastic Computer Science Graduate and Software Developer with experience in building scalable applications and AI-driven systems. Skilled in C++, C#, Angular, React, Vue and Nuxt.js with a strong foundation in software engineering principles. Adept at collaborating in cross-functional teams and eager to drive innovation at the intersection of computer science and technology.

TECHNICAL SKILLS

C++	React / Angular.js	SQL	Git / Jenkins
C#	Vue/Nuxt.js	Html/Css/Typescript	REST APIs

WORK EXPERIENCE

WebReinvent Technologies

March 2026 - Present

Working as a Frontend Developer, learning and using modern technologies like Vue.js and Nuxt.js. Contributing to real-world projects such as the Toolstation website. Gaining hands-on experience with version control, following GitFlow practices, and collaborating through GitLab for efficient team-based development.

Admiral India

September 2025 - March 2026

Gaining hands-on experience in core programming, full-stack development, and DevOps practices. Working in an agile environment with technologies such as Java Spring Boot, React, and Angular to build and maintain scalable applications. Actively using DevOps tools including Git and Jenkins, while gaining exposure to on-site professional work culture and real-world project requirements.

The Brown Academy (NZ)

August 2024 - June 2025

My first professional experience was as a game programmer, where I wrote production code in C# and Unity, learned Jira and agile workflows, and independently built the Bazaar Broker project using React + Vite with C# APIs, while collaborating with cross-functional teams.

PROJECTS

ERP System

January 2026

Angular Based Attendance & Leave Management Webapp

Developed an Angular-based ERP application for leave and attendance management using TypeScript. Implemented a modular architecture with reusable shared components and dedicated services. Used Jasmine and Karma for unit testing to ensure code quality, reliability, and maintainability, while following clean coding practices for scalable and efficient development.

Bazaar Broker

March 2025

Game Tracker Website

Developed my first web application using React: a game tracker and battle simulation platform for The Bazaar, allowing users to simulate in-game battles in advance. Integrated a C#-based API to fetch cards and creature data, and implemented webhooks, Google reCAPTCHA, and robust form validation to ensure secure and reliable user interactions.

ACHIEVEMENTS

Co-authored a research paper titled 'Enhancing NPCs realism with AI' for Escape the AI project; accepted for Scopus indexing (Nov 2025). Available on [GRENZE Scientific Society](#).

EDUCATION

Bachelor of Technology (2021-2025)

Majors: Computer Science Engineering
JEMTEC, Greater Noida

Secondary Education (2018)

BMVB- ASMA

Senior Secondary Education (2020)

BMVB- ASMA
